PROJECTS

Tourism
A website that helps users plan their trips, including finding destinations. This website aimed at showcasing local attractions and boosting visitor engagement. Developed the website using HTML5, CSS3, and JavaScript, focusing on responsive design to accommodate various devices and screen sizes. Implemented user-friendly layout to guide users through enticing content and activities. CSS animations and transitions to add a look of interactivity, capturing user's attention and enhancing the overall experience.

Contact Book, *A contact book is created using Tries data structure in python where users can save their contacts, delete, and also search*
